

Rashmil Kukreja

SUMMARY

Visionary professional with extensive experience in application maintenance and development. Proven ability to enhance and build scalable solutions within fast-paced delivery cycles. Skilled in project planning and development, ready to address new challenges effectively.

EXPERIENCE

Oracle Pvt Ltd - Lead DevOps Engineer

Hyderabad, India • 07/2022 - Current

ServiceNow - Senior Software Engineer

Hyderabad, India • 03/2022 - 06/2022

Pegasystems Inc - Software Engineer

Hyderabad, India • 08/2020 - 03/2022

Oracle Pvt Ltd - Software Engineer

Hyderabad, India • 02/2019 - 08/2020

Capgemini Pvt Ltd - Senior Software Engineer

Hyderabad, India • 12/2016 - 01/2019

PROJECTS

- **CI/CD Deployment of Microservices in OKE Cluster - Oracle**
Architected and implemented CI/CD pipelines for deploying microservices on Oracle Kubernetes Engine (OKE). Developed reusable Helm charts and standardized deployment workflows, reducing configuration drift and enabling consistent releases across teams. Designed multi-stage environments (Alpha, Beta, Gamma) to support progressive testing and improve release reliability and scalability.
- **Monitoring & Alerting for Kubernetes Pod Failures - Oracle**
Implemented a robust observability solution using Prometheus, Grafana, and Alertmanager to monitor Kubernetes workloads. Integrated Slack-based alerting for real-time incident notifications, improving system visibility and significantly reducing mean time to detection (MTTD) and response (MTTR).

SKILLS

Containerization and orchestration: Docker, Kubernetes, and Helm

- CI/CD tools: GitHub Actions and Jenkins
- Infrastructure as code: Terraform and AWS CloudFormation
- Monitoring and observability: Prometheus, Grafana, and ELK Stack
- Programming and scripting: Java and Spring Boot
- Databases and data tools: AWS Redshift
- Other tools: Git, Linux, Nginx, PagerDuty, and Slack

CERTIFICATIONS

Terraform: HashiCorp Certified: Terraform Associate (003)

KCNA: Kubernetes Certified Native Associate

CKA: Certified Kubernetes Administrator

- **CI/CD Pipeline with Terraform & GitHub Actions - AWS**

Developed a fully automated CI/CD pipeline to deploy a static website using Terraform and GitHub Actions. Enabled infrastructure provisioning and deployment on every code commit, ensuring consistency through Infrastructure as Code (IaC) and eliminating manual intervention.

- **Container Orchestration using Docker Swarm - AWS**

Deployed containerized applications across multiple AWS EC2 instances using Docker Swarm. Configured service replication, cluster networking, and NGINX-based load balancing to achieve high availability, fault tolerance, and efficient traffic distribution.

- **Automated EKS Cluster Provisioning - AWS**

Provisioned and configured a production-ready Kubernetes (EKS) cluster using Terraform. Automated setup of networking (VPC), IAM roles, node groups, and Application Load Balancer (ALB), enabling secure, scalable, and repeatable application deployments.

- **Centralized Alerting System using ELK Stack - Oracle**

Built an end-to-end alerting system by integrating application logs into the ELK stack (Elasticsearch, Logstash, Kibana). Developed a Spring Boot service and configured Kibana watchers to trigger alerts via PagerDuty for critical events, improving incident detection and response efficiency.
