

kukreja.rashmil@gmail.com
(+91) 8219646912

Skills

- Container orchestration: Helm
- CI/CD tools: GitHub Actions and Jenkins
- Infrastructure automation: Terraform
- Monitoring solutions: ELK, Grafana
- Programming: Java
- Problem solving
- Databases: AWS Redshift
- Version control: Git
- Incident management: PagerDuty, Ocean
- Cloud platforms: AWS, OCI

Education

01/2016

B.E.:

Chitkara University

Score: 7.7/10

01/2012

**12th Standard - CBSE:
O.S.D.A.V.Public School**

Kaithal, Haryana

Score: 74%

01/2010

**10th Standard - CBSE:
O.S.D.A.V.Public School**

Kaithal, Haryana

Score: 84%

Certifications

- CKA: Certified Kubernetes Administrator.
- Terraform: HashiCorp Certified Terraform Associate (003)
- KCNA: Kubernetes Certified Native Associate
- OCI: Oracle Cloud Infrastructure 2023 Certified Foundations Associate (OCI).

Rashmil Kukreja

Summary

Lead DevOps Engineer with extensive experience at Oracle Pvt Ltd, excelling in container orchestration and infrastructure automation. Proven track record in implementing CI/CD pipelines and enhancing monitoring solutions, coupled with strong problem-solving abilities. Adept at leveraging AWS and Terraform to drive operational efficiency and reliability.

Experience

Oracle Pvt Ltd - Lead DevOps Engineer

Hyderabad, India

07/2022 - Current

ServiceNow - Senior Software Engineer

Hyderabad, India

03/2022 - 06/2022

Pegasystems Inc - Software Engineer

Hyderabad, India

08/2020 - 03/2022

Oracle Pvt Ltd - Software Engineer

Hyderabad, India

02/2019 - 08/2020

Capgemini Pvt Ltd - Senior Software Engineer

Hyderabad, India

12/2016 - 01/2019

Projects

• CI/CD Deployment of Microservices in OKE Cluster – Oracle

Architected and implemented CI/CD pipelines for deploying microservices on Oracle Kubernetes Engine (OKE). Developed reusable Helm charts and standardized deployment workflows, reducing configuration drift and enabling consistent releases across teams. Designed multi-stage environments (Alpha, Beta, Gamma) to support progressive testing and improve release reliability and scalability.

• Monitoring & Alerting for Kubernetes Pod Failures – Oracle

Implemented a robust observability solution using Prometheus, Grafana, and Alertmanager to monitor Kubernetes workloads. Integrated Slack-based alerting for real-time incident notifications, improving system visibility and significantly reducing mean time to detection (MTTD) and response (MTTR).

- JAVA: Oracle 1Z0-851 Oracle Certified Programmer for the Java Platform, Standard Edition 7 (OCJP 7).

Websites, Portfolios, Profiles

- www.rashmilkukreja.in
- <https://www.linkedin.com/in/rashmilkukreja/>

- **CI/CD Pipeline with Terraform & GitHub Actions – AWS**

Developed a fully automated CI/CD pipeline to deploy a static website using Terraform and GitHub Actions. Enabled infrastructure provisioning and deployment on every code commit, ensuring consistency through Infrastructure as Code (IaC) and eliminating manual intervention.

- **Container Orchestration using Docker Swarm – AWS**

Deployed containerized applications across multiple AWS EC2 instances using Docker Swarm. Configured service replication, cluster networking, and NGINX-based load balancing to achieve high availability, fault tolerance, and efficient traffic distribution.

- **Automated EKS Cluster Provisioning – AWS**

Provisioned and configured a production-ready Kubernetes (EKS) cluster using Terraform. Automated setup of networking (VPC), IAM roles, node groups, and Application Load Balancer (ALB), enabling secure, scalable, and repeatable application deployments.

- **Centralized Alerting System using ELK Stack – Oracle**

Built an end-to-end alerting system by integrating application logs into the ELK stack (Elasticsearch, Logstash, Kibana). Developed a Spring Boot service and configured Kibana watchers to trigger alerts via PagerDuty for critical events, improving incident detection and response efficiency.
